PROFILE SUMMARY

I'm a passionate undergraduate student at SLIIT University, having recently completed my second year. I have gained valuable experience in UI/UX development and principles through hands-on projects, and I am proficient in React.js, HTML, CSS, wireframing, and prototyping. I am actively seeking a UI/UX engineer or developer internship role, where I can contribute my skills, continue to learn, and adapt to new technologies and design trends while gaining further knowledge and experience in the field.

EDUCATION

- 2022 - Present
SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT)
 - BSc (Hons) in Information Technology Specializing in Information Technology
- 2007 - 2021

PROJECTS

3D-Portfolio

(React, Vite, Three js ,Javascript, Tailwind CSS)

2024

- This website showcases my skills in user interface design and 3D model implementation. It features advanced 3D visuals and animations, demonstrating my expertise in creating dynamic and engaging web experiences.

Online student help desk

(HTML, CSS, Javascript, Java)

2023

- This web application was built as a second year university project .
- This website is built on key UI principles to ensure ease of use and intuitive navigation.

Glamour lane

MERN Stack (MongoDb, Express js, React, Node js, Tailwind CSS)

2024

- This web application was developed as part of a university project by a team of 8 members, created to meet a specific client's requirements. The project allowed us to effectively combine our diverse skills and collaborate efficiently.
- We integrated special libraries, such as Framer Motion, to craft a visually engaging and dynamic user interface. These advanced animations and interactions enhance the overall aesthetic appeal of the application.
- Throughout the development process, we prioritized mastering key UI principles. This ensured that every aspect of the interface, from navigation to layout, followed best design practices.

Hotel management system

(HTML, CSS, Javascript)

2022

- This web application was built as part of a first-year university project, demonstrating our foundational skills in web development.
- The website includes all the essential features and functionalities, showcasing our understanding of basic UI/UX principles, responsive design, and front-end development techniques.
- Through this project, we applied our learning to create a functional and user-friendly interface, laying the groundwork for more advanced projects in the future.
